

Patient Partner – What is it?

Patient Partner is the new automated way of booking, cancelling or checking your own appointments with your surgery.

You telephone the surgery as normal, and choose the option from the menu to use the Automated Booking Service.

Patient Partner will give you useful options to ensure that you get an appointment to suit your needs.

One of the main benefits of Patient Partner is that you are able to telephone the surgery at any time - even when it's closed!

You can use Patient Partner to book appointments, cancel them when necessary or simply use it to check the time of your appointment.
